

# Adobe DNG Converter - Release Notes

## Version 13.2 (March 2021)

The Adobe DNG Converter is a free utility that enables you to easily convert camera-specific raw files from more than 700 cameras to the more universal DNG raw format.

Digital Negative was developed to address the lack of an open standard for the proprietary and unique raw files created by each digital camera. DNG allows photographers to archive their raw camera files in a single format for easy cataloging and access in the future.

With the format specification freely available, any developer can build software that supports and takes advantage of DNG. For more information, visit the [Digital Negative page](#).

Support for the following cameras has been added. Visit the [Camera Raw page](#) for a complete list of supported cameras.

- DJI Mavic 2 Pro (HasselbladL1D-20c)
- Fujifilm GFX 100 IR
- Fujifilm GFX 100S
- Fujifilm X-E4
- Phase One IQ4 150MP Achromatic\*
- Samsung Galaxy S21 Rear Main Camera
- Samsung Galaxy S21 Rear Wide Camera
- Samsung Galaxy S21+ Rear Main Camera
- Samsung Galaxy S21+ Rear Wide Camera
- Samsung Galaxy S21 Ultra Rear Main Camera
- Samsung Galaxy S21 Ultra Rear Wide Camera
- Sony Alpha 1 (ILCE-1)

(\* ) S14 and S14+ raw compression modes are unsupported.
